

**Christian Chryptocurrency Coin (CCC)
Whitepaper Version 1.4**

Christian Chryptocurrency Coin (CCC) We're based in the United States.

Christian Cryptocurrency Coin (CCC) is a new Christian cryptocurrency listed on XLM blockchain as a religious token. It does not hold monetary value, and it is non-profitable. Revenues generated from the token were planned to be used in spiritual ways like charity – however the cost of creating and the rise of XLM in value has proven that CCC will not break even. Now, the coins will be spread through a span of what is selling on Stellarport.

Our website <https://christiancryptocurrency.tech>. There will only be 10,000,000 CCCs ever in circulation. Approximately MARCH 13th, 2021 Version 1.4: On Stellarport we have KNOWN status 100,000 CCC was sent to a Minister that helped with the coin. The coin will have it's website until 2023, and other than that, the token has lost all backing and/or interest from the creators, and leaving as a non-monetary element out there for people to have fun with.
